### **Aperture to Reveal Data Center Risks and Solutions at Interop Data Center Summit**

**May 16, 2007**

Aperture Technologies, Inc., the leading global provider of software for managing the physical infrastructure of data centers, will present at the upcoming Interop Data Center Summit in Las Vegas, Nevada on Monday, May 21, 2007 to discuss how to manage power and cooling resources in the data center.

Aperture vice president of product/market strategy, Steve Yellen will deliver a presentation focusing on the challenges organizations face by incorporating new technologies like high density servers and possible solutions for addressing the complex data center environment.

Who: Steve Yellen, vice president of product/market strategy, Aperture Technologies, Inc.

What: "Avoiding the Impending Crisis: Managing Power and Cooling in Today's Data Center" - Attendees will benefit from Mr. Yellen's extensive knowledge of the data center and his marketing and technology experience, which spans over 20 years. In his current role, he drives product and brand management as well as product marketing and marketing strategy. Prior to joining Aperture, Mr. Yellen, worked with DataViz, McDonnell Douglas and IBM.

The Interop Data Center Summit, May 20-25, 2007, offers an educational program to IT professionals to address new developments transforming data centers with a focus on IT solutions, operational processes and business issues. The main attraction is the range of speakers present at this event. Attendees will have the opportunity to network with IT and business leaders and to view that latest approaches to managing data centers.
