FOR IMMEDIATE RELEASE

Aperture Addresses Best Practices in Infrastructure Capacity Planning at Data Center Decisions 2005

Stamford, CT – June 4, 2005 – Aperture, the global provider of enterprise software solutions enabling organizations to strategically manage their data center infrastructure, showcased Aperture VISTA™ 400 at this year's Data Center Decisions held in New York this week.

With a targeted theme of, "The New Data Center: Strategies for Today and Tomorrow," the conference was attended by over 300 executives from Fortune 1000 companies, and presented several best practices for critical design and operational processes, as well as how IT professionals can stay current with emerging technologies and trends.

Aperture delivered demonstrations of Aperture VISTA 400 for IT professionals managing enterprise data centers. Aperture VISTA reduces operational risk and improves efficiency through the visual management of the data center physical infrastructure by improving planning, design, provisioning, troubleshooting and reporting.

In addition, Aperture also had the opportunity to speak to conference attendees about infrastructure capacity management as part of the Solution Spotlight. Steve Yellen, Senior Director of Marketing, discussed optimizing infrastructure capacity in today's enterprise and why it is both more challenging and critical today. Mr. Yellen also covered new challenges in infrastructure capacity management and presented a maturity model and roadmap for building a plan.

Aperture has helped hundreds of organizations gain control over the complex environment of their data centers. The Aperture solutions that will be showcased have already been implemented in many Fortune 500 companies.

About Aperture

Aperture is a global provider of enterprise software solutions that enable organizations around the world to strategically manage their business infrastructure. With Aperture solutions, companies increase operational efficiency and make better business decisions. Aperture software solutions utilize advanced visualization and work-process technology to help organizations optimize their infrastructure.
