

FOR IMMEDIATE RELEASE**Aperture Offers an Exclusive Fall Seminar Series on Best Practices in Data Center Infrastructure Management in Select Cities**

Stamford, CT – August 20, 2005 – Aperture, the global provider of enterprise software solutions enabling organizations to strategically manage their data center infrastructure, is offering an exclusive seminar series on best practices in data center infrastructure management. As companies begin to view managing data center operations with standardized and automated solutions as a significant priority within their IT infrastructure process methodologies, understanding how Aperture VISTA™ automates data center operations and integrates within the enterprise architecture is essential.

A variety of topics will be discussed in the exclusive seminar series, including how to best run a world-class data center with Aperture VISTA, how Aperture VISTA integrates with various enterprise systems (such as change management systems, configuration management databases and asset management systems), and key Aperture VISTA success stories with regards to data center access, equipment installations, capacity planning, compliance with regulations, security, disaster recovery and meeting Service Level Agreements (SLAs) within the data center.

Aperture's exclusive seminars will be held in the following cities during the Fall 2005 segment of the Data Center Best Practices Seminar Series:

- Alexandria, VA on August 24, 2005, featuring Rod lehle of Eagle Alliance and Dennis Smith of St. John's Consulting
- Minneapolis, MN on November 8, 2005, featuring Doug Hall of Target Corporation
- New York, NY on November 15, 2005, featuring Jack Glass of Citigroup and Dennis Smith of St. John's Consulting
- Chicago, IL on December 7, 2005, featuring Gary Aron of Mission Critical Enterprises (formerly Senior Vice President of Data Center Operations at JPMorgan Chase)

For more information to attend one of these exclusive seminars, please contact Aperture Technologies at info@aperture.com.

About Aperture

Aperture has helped hundreds of organizations gain control over the complex environment of their data centers. The Aperture solutions that will be showcased have already been implemented in many Fortune 500 companies. Aperture VISTA improves planning, design, provisioning, troubleshooting and analysis through the visual management of the data center.

Aperture is a global provider of enterprise software solutions that enable organizations around the world to strategically manage their business infrastructure. With Aperture solutions, companies increase operational efficiency and make better business decisions. Aperture software solutions utilize advanced visualization and work-process technology to help organizations optimize their infrastructure. Founded in 1987, Aperture is headquartered in Stamford, CT, with offices and partners located worldwide. For more information, please go to: <http://www.aperture.com>.
