## Aperture Technologies to Present at Interop New York Show

*Session will discuss impending crisis data centers face and advise operators how to manage power, cooling, space, network and storage challenges*

**Stamford, Conn., Sept. 13, 2006** – Aperture Technologies Inc., the leading provider of enterprise software solutions that enable organizations worldwide to manage the physical infrastructure of their data centers, today announced that Steve Yellen, Vice President of Marketing, will present and participate in a panel discussion on data center issues on Sept. 20 at Interop New York 2006.

The conference, which takes place in New York from Sept. 18 through Sept. 22, is a comprehensive event that helps IT and business decision-makers bring together the key components of a solid information strategy to drive efficiency and competitive advantage for their organizations.

**Who:** Steve Yellen, Vice President of Marketing, Aperture Technologies.

**What:** Mr. Yellen will deliver a presentation called “Managing Today’s Data Center: Avoiding the Impending Crisis.” He will discuss how organizations must change the way they run their data centers to meet future demands caused by physical factors such as power costs, cooling requirements, network performance, space planning, and storage capabilities. Mr. Yellen will participate in a three-member panel discussion moderated by Andreas Antonopoulos, Senior Vice President of Nemertes Research. The panel is entitled “Data Center Facilities: How to Keep Cool.”

**Where:** Jacob Javits Convention Center, New York, N.Y. The “Data Center Facilities” session will take place in Room 1E06.

**When:** The presentation and panel discussion take place on Wednesday, Sept. 20, at 11:15 a.m. EDT.

### About Aperture

Aperture is the leading provider of enterprise software solutions that enable organizations worldwide to manage the physical infrastructure of their data centers. Aperture solutions automate and facilitate standardized best practice processes to manage the complexity and ever-changing conditions in today’s enterprise data centers and to deliver world-class performance in IT operations. With Aperture, organizations worldwide have reduced operational risks, increased efficiency and generated actionable information to make better business decisions.
