Global Leader in Delivery Services Selects Aperture VISTA to Manage World-Class Data Center Operations

TNT Turns to Aperture for Infrastructure Planning, Design and Provisioning

Stamford, CT – September 5, 2006 – Aperture Technologies, Inc., the leading provider of enterprise software solutions that enable organizations worldwide to manage the physical infrastructure of their data centers, today announced that TNT N.V., a global provider of mail and express delivery services, has selected the enterprise software solution Aperture VISTA 400® to enable better equipment planning and environmental control of its data center operations.

“We wanted a view into our data center that will enable us to manage it more effectively but also aid us in the future planning of resources,” said Dave Carey at TNT NV. “Aperture VISTA 400 will arm us with the information we need for a balanced, controlled data center and more efficient use of available resources.”

TNT’s company mission is to provide the best in customer service and exceed expectations in transferring goods and documents around the world. In order to provide the most reliable and efficient solutions in the distribution and logistics industry, an extremely competitive business, TNT needed an application that could give them the management capabilities and uptime demanded in its data center. TNT selected Aperture VISTA 400 based on its critical functionality in infrastructure planning and design. Additionally, TNT plans to use VISTA for provisioning, troubleshooting and analysis.

“The onset of new complex, distributed technologies has intensified IT organizational challenges,” said William T. Clifford, Chairman and CEO of Aperture Technologies, Inc. “With Aperture VISTA 400, companies like TNT can keep these systems in check and enable proactive infrastructure planning.”

Aperture VISTA 400 delivers the key processes that enable organizations to take control of an increasingly complex physical environment including equipment, space, power, environmental, network, and storage. The software’s unique visual management capabilities will enable TNT to reduce operational risk and improve efficiency of its data centers. The software is designed to assist organizations in managing capacity planning and utilization issues of complex physical infrastructures. For example, organizations can see all infrastructure variables at a glance, including space, power, cooling, network, and storage, to keep the data center at peak efficiency.

About TNT

TNT N.V. provides businesses and consumers worldwide with an extensive range of services for their mail and express delivery needs. Headquartered in the Netherlands, TNT offers efficient network infrastructures in Europe and Asia and is expanding operations worldwide to maximize its network performance. TNT serves more than 200 countries and employs over 128,000 people (over 163,500 people including the division Logistics which is intended to be divested). In the first half of 2006, TNT reported €5.3 billion in revenues (over 7 billion including Logistics). TNT N.V. is publicly listed on the stock exchanges of Amsterdam and New York. TNT recognizes its social
