Aperture Technologies to Present at Upcoming Uptime Institute Symposium

Stamford, CT, April 20, 2006 – Aperture Technologies Inc., the leading provider of enterprise software solutions that enable organizations worldwide to manage the physical infrastructure of their data centers, today announced that Sean Nicholson, Director of Product Management, and Aman Khan, Director of Product Architecture, will present on Best Practices for Managing High Density Equipment at the Uptime Institute Symposium. The Company will also be exhibiting at the show where attendees can learn more about its Data Center Infrastructure Management solution, Aperture VISTA.

The conference, which takes place in Orlando, FL from April 23-26, is the first fully integrated all-stakeholder event to proactively address high density computing best practices ranging from total cost of ownership to cooling. The Uptime Institute Symposium aims to give industry players and end users an opportunity to learn about and discuss solutions to the increasing heat density problems they face and ultimately arm attendees with the information necessary to increase overall site uptime.

Who: Aman Khan, Director of Product Architecture and Sean Nicholson, Director of Product Management

What: Mr. Khan and Mr. Nicholson will deliver a presentation on the new challenges of managing a data center. This session will cover how data centers today are a mission critical resource to the enterprise. They are complex environments that undergo extensive change, and must be managed as world-class facilities. High density equipment has made managing the data center even more challenging. Attendees will hear how organizations are enforcing best practices and using decision support systems to manage their enterprise data centers for high density equipment.

Where: Hyatt Regency Orlando, International Airport, Orlando, FL. For more information and to visit Aperture at the conference please stop by booth # 31.

When: The presentation takes place on Monday, April 24 at 4pm EDT. The conference runs from April 23-26.

About Aperture

Aperture is the leading provider of enterprise software solutions that enable organizations worldwide to manage the physical infrastructure of their data centers. Aperture solutions automate and facilitate standardized best practice processes to manage the complexity and ever-changing conditions in today's enterprise data centers and to deliver world-class performance in IT operations. With Aperture, organizations worldwide have reduced operational risks, increased efficiency and generated actionable information to make better business decisions.
