

Aperture completes installation at King County Government

Washington's largest county purchases Aperture VISTA

Stamford, CT - July 28, 2008 – Aperture, an Emerson Network Power brand, and the leading global provider of software for managing the physical infrastructure of data centers, has won and completed a contract with King County Government in Washington State.

The contract was won by Aperture following King County's request for proposal (RFP): 'Data Center Visualization Software'. The RFP was fulfilled with the installation of Aperture's data center management solution, VISTA 500, in King County Government's 6,000 square foot data center.

Aperture VISTA is an enterprise-class data center service management solution that delivers visualization, workflow, auditing and greater control of data center operations. VISTA provides the tools for managers to track physical assets (from servers to power distribution units), manage installations and decommissions, measure capacities, and plan for changes. Users of the Aperture VISTA repository can gain insight into the current and future state of their data centers. They are also able to view month-to-month comparisons of key data center metrics highlighting increases and decreases in resource usage.

Steve Yellen, Vice President of Product and Market Strategy, Aperture Technologies Inc., said: "Aperture VISTA revolutionizes the way companies manage today's complex data centers by giving managers a greater level of control. Our work with multiple public sector organizations is proof that we consistently offer our customers a solution that delivers tracking and visualization of the data center physical assets."

Aperture Technologies is the leading global provider of software for managing the physical infrastructure of data centers. The company has over 20 years' experience in data center management and a database of over 15,000 data center components. Aperture's VISTA product is used by over 250 data center customers including more than 50 of the Fortune 1000/Global 500.

About Aperture

Emerson Network Power, a business of Emerson (NYSE: EMR), is the global leader in enabling *Business-Critical Continuity™* from grid to chip for telecommunication networks, data centers, health care and industrial facilities.
